DETAILED ACTION

Response to Arguments

1. The Examiner withdraws the objection under 37 CFR 1.71 based on the Applicant's amendment.
2. The Examiner withdraws the objection to the Abstract based on the Applicant's amendment.
3. The Examiner withdraws the rejection under the first and second paragraphs of 35 U.S.C. 112 based on Applicant's amendment.

Specification

4. Applicant is reminded of the proper language and format for an abstract of the disclosure.
5. The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.
6. The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.
7. The abstract of the disclosure is objected to because it consists of multiple paragraphs. Correction is required. See MPEP § 608.01(b).

Art Unit: 2621

8. The disclosure is objected to because of the following informalities: the specification (pg. 20, line 14) recites the word "row" instead of "raw."
9. Appropriate correction is required.

Claim Objections

10. Claim 1 is objected to because of the following informalities: lines 7-8 should read "an authentication means of judging whether or not a command issuing origin..." Appropriate correction is required.

11. Claims 8 and 9 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend on another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

12. Claims 8-9 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. As disclosed on page 26 of the specification the claimed program is effectively a signal. The claimed medium must be a "computer readable medium encoded with computer program."

Allowable Subject Matter

13. Claims 1-7, 10, and 11 allowed over the prior art.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
